

7. how a generator works, and how it provides power to their homes
8. math
9. robotics (remote control)

Every child who has ever joined in the amateur radio club at his/her school has found themselves a step above their classmates on the learning curve.

The DBARA now has radio clubs in three area schools. Our volunteer instructors are:

1. Horizon Elementary, Port Orange - Dave (Sparky) Lammer AE4DL,
2. Samsula Elementary, Samsula - Barbara Vola, newly licensed KJ4MOA, who is also a teacher at Samsula.
3. Starke Elementary, DeLand- Doug Hubb K4DMH

Since we started this program we have added one school at a time, year by year. And we hope to keep growing. These schools are now part of a growing national education system sponsored by the American Radio Relay League (ARRL) The young Ham Radio fans enjoy talking to each other and sharing their new found knowledge on special children's radio nets arranged by DBARA on the local club repeater.

We are also planning to start a radio club for the Boys and Girls Club in Daytona Beach this coming year.

President of the DBARA
